- and others with the same connector

(see connector table available in *download* section)

This device allows you to upgrade your interface and expand functionality to work with additional autogas GPL ECUs installed in vehicles (we use 4-lines cable). We guarantee compatibility with any interfaces (including other manufacturers)

If You do not already have one, you can buy it at our other auctions without incurring additional costs for the shipment.

Specification

- flexible cable with copper wires 4x0,75mm²
- adapter length about 15cm
- compatible with any interface with connector number 1 (connector type molex 2x4pin)

If you have diagnostic interface with a different connector or You do not see the adapter needed - contact us, we have all kinds of plugs and we are ready to produce it.
