Product description

The subject of sale is a cable with clamped pins / terminals and a socket - the device is assembled.

- cable length: about 15cm (it is possible to make a different cable length)
- wire type: 4x0.75mm²
- socket type: 8-pin (2x4 pins) MOLEX male (female terminals) - usually used in diagnostic interfaces

We are the producer and can prepare any lengths - please contact us if you are looking for something else.
