LPG GPL Vapour phase filter 12x12 mm tissue paper or polyester popular in STAG KME LOVATO LANDI ATIKER and others FL01S-SP12

Price	3.50 Euro
Availability	Always on stock
Shipping time	24 hours
Number	PT-FL01S-SP12

Product description

A metal vapour phase filter that fits most autogas sequential installations with gas lines diameter of 12/12 mm

FILTER USED POPULAR IN MANY INSTALLATIONS

e.g.
AC Stag 4 Q-box Q-max 20000, Kme Diego Bingo Nevo, Autogaz AGC Zenit Compact Bluebox, Lovato Fast Smart Exr Exp, Europegas, Dt-gas system, Europegas, Esgi, Eureka, Agis, Altis, Brc sequent 24 32 56, Bigas, LPGTECH, Landi Renzo, Tomasetto, Tartarini, Valtek, Solaris and so on
....

Filter mounted between the LPG injections set and reducer.

FILTER PARAMETERS

- FLASH PHASE: with high quality paper insert
- FILTER AREA: 0.039m²
- CAPACITY: 18 l / s
- INLET / OUTLET: 12/12 mm

APPROVAL
67R-010 703

CL2

High quality filter paper effectively stops almost all solid contaminants with diameters of about 2 µm, protecting gas injectors. Regular filter replacement every 10-15 thousands km ensures adequate lifetime of the entire LPG installation with the vehicle. The vapour phase filter is of particular importance to the operation of gas injectors and has a direct effect on preventing the firing of valves in the engine head. Clean gas injectors can deliver identical portions of gas to individual cylinders and this has a direct impact on the proper engine operation parameters and the process of its consumption.

A filter from the Polish producer CZAJA

This product has additional options:

Type of the filter: vapour phase filter

Type of LPG filter cartridge: tissue papper 843 VH 134

Filter inlet: Ø 12mm

filter outlet: Ø 12mm
