## Specifcaton

LPG diagnostic interface made by ProjektTECH with USB FTDI equipped with high voltage protection.

Designed for workshop use. Genuine electronics, strong and flexible cable and additional safety components make our devices stable and safe, regardless of the external factors generated by the operating engine and vehicle components.

The interface allows full diagnostics of the LPG system as well as adjustment (self calibration, maps, switching temperature, rotation, etc.).

## Specifications:

- Very easy installation in any operating system (FTDI chip)
- additional protection systems (overvoltage and reverse polarity)
- trouble-free cooperation with the latest diagnostic programs
- SERVICING 100% of the functions of gas controllers
- 4 meter solid wire with double screen (aluminum screen + braided steel bundle)
- reinforced cable ends
- Rain-resistant interface (rubber flanges, SMD controls inside the enclosure)
- Works on Windows 10 and all previous versions
- 3 x LED in housing:

READY - ready to work, the LED lights up after drivers are installed

IN - transmission is beeing to the PC

OUT - transmission is beeing to the vehicle
