## Vapour phase LPG GPL filter 12/3x7 mm tissue paper FL3

Price	<b>6.00 Euro</b>
Availability	<b>Always on stock</b>
Shipping time	<b>24 hours</b>
Number	<b>PT-FL3</b>

### Product description

A metal vapour phase filter that fits most autogas sequential installations with gas lines diameter of 12/3x7 mm

Filter mounted between the LPG injections set and reducer.

#### FILTER PARAMETERS

- FLASH PHASE: with high quality paper insert
- FILTER AREA: 0.039m<sup>2</sup>
- CAPACITY: 18 l / s
- INLET / OUTLET: 12/3x7 mm

#### APPROVAL

67R-010 703  
110R-000025  
CL2

High quality filter paper effectively stops almost all solid contaminants with diameters of about 2 µm, protecting gas injectors. Regular filter replacement every 10-15 thousands km ensures adequate lifetime of the entire LPG installation with the vehicle. The vapour phase filter is of particular importance to the operation of gas injectors and has a direct effect on preventing the firing of valves in the engine head. Clean gas injectors can deliver identical portions of gas to individual cylinders and this has a direct impact on the proper engine operation parameters and the process of its consumption.

A filter from the Polish producer CZAJA

### This product has additional options:

**Type of the filter:** vapour phase filter

**Type of LPG filter cartridge:** tissue papper 843 VH 134

**Filter inlet:** Ø 12mm

**filter outlet:** 3 x Ø 7mm
